About Us

For2Fi provides a Managed Cradlepoint device and connectivity on all major carriers (Verizon, AT&T, T-Mobile, US Cellular, Bell Canada and Rogers). For2Fi's managed services alert customers when the cell signal drops so we can assure them the backup is available when needed. For2Fi also alerts customers when they hit 75%, 90% and 100% of their data plan so they never get surprised with overage charges. For2Fi can help transition them to larger plans mid-month to minimize the overage spend.

Our Service

For2fi can help provide connectivity and keep employees and services connected. Expand your organizations connectivity options with For2Fi managed wireless, an ideal use case for:

- Locations where quality fiber or broadband are not available.
- Events that only require temporary or sporadic connectivity.
- Mobile employees, offices or vehicles that require internet.
- Redundant Internet connectivity

ERICSSON

Our dedicated sales team is ready to discuss your customer's needs and determine how For2Fi can help propel your business forward. No project is too big or small! Contact our channel team today to see how For2Fi can help.

Why For2Fi:
