OUTDATED COPPER LINES
ARE HOLDING YOU BACK

Is Your Business Ready for the Future?
With over 1 billion copper POTS lines being decommissioned worldwide, it's time to modernize your communication systems. The Federal Communications Commission (FCC) mandates are driving the shutdown of these outdated lines, and businesses like yours will feel the impact.

WHY UPGRADE NOW?

FCC SHUTDOWN
On August 2, 2019, FCC order 19-72A1 officially granted telecommunications carriers permission to abandon outdated, degrading copper POTS lines. Businesses relying on POTS lines need to act now to avoid service disruptions as copper line support is phased out.

RISING COSTS
Maintaining aging copper infrastructure is expensive and unreliable. Line rates have surged by 100% to 1,000%, with costs still rising.

REGULATORY COMPLIANCE
Legacy POTS lines no longer meet the stringent standards for safety, payment processing, and data privacy, leaving your business exposed.

Get ahead of these challenges with a streamlined transition to modern, digital solutions.

POWERFUL, ALL-IN-ONE

NEXT GENERATION
POTS LINE SOLUTIONS

✔ **INSTANT COST SAVINGS**
In most cases, switching to our solution immediately lowers monthly operational costs by reducing reliance on costly POTS lines.

✔ **COMPREHENSIVE COMPLIANCE**
Fully compliant with NFPA 72, E911, HIPAA, PCI, TAA, and Fed Ramp, ensuring regulatory safety.

✔ **SCALABILITY & FLEXIBILITY**
Supports small to large-scale deployments with both 5G capability and multi-carrier SIM options.

✔ **REMOTE CLOUD MANAGEMENT**
Accessible management and reporting through a user-friendly portal.

✔ **ROUTER VERSATILITY**
Add on services like 5G Broadband, Internet Backup and SDWAN options available.
