

No Cable, No Fiber, No Problem!

CRADLEPOINT L950 LTE ADAPTER

L950 LTE Adapter

Available as a primary or backup device with
2G of data!

Designed for remote sites that require secure, reliable failover connectivity in the event of a primary link disruption, the L950 Series cellular broadband adapter is a simple addition at the branch which significantly improves uptime and business continuity. These sophisticated devices can be configured at scale with NetCloud to offer a full range of zero-touch deployment, troubleshooting, and management features and integrate into existing configurations with standards-based routing, traffic shaping, and VPN support.

ERICSSON

No Cable, No Fiber, No Problem!

Notable Features:

- Maximize network uptime using LTE WAN for failover and link diversity.
- Deploy within any existing networking or SD-WAN environment.
- Configure with greater simplicity and confidence with the wizard-based installation application.
- Utilize Day-1 connectivity while waiting for terrestrial links.
- Manage the Cradlepoint router and LTE adapter as one entity for singular control and visibility.
- Troubleshoot adapter and in-line devices with advanced Out-of-Band Management to reduce truck rolls.
- Offload primary connections during traffic surges and network congestion.
