

NEXT GENERATION POTS LINES

PR08-PRO

For2Fi is now offering the PR08-Pro Dual WAN VoIP Router for the best POTS Replacement Solution that offers a piece of mind.

The PR08-Pro is a highly integrated ATA gateway for POTS replacement solution. It provides 8 FXS ports to establish communications for emergency call panels, alarms, FAX machines, ATM or POS terminals, and more. The PR08-Pro integrates built-in battery that provides redundancy in power outages. For2Fi can ensure your customers have an uninterrupted connection with calls and network in crucial moments.

The Pro8-Pro integrates a built-in 44Wh battery and a type-C USB port for external power banks. This helps prevent power failures to provide you with uninterrupted operations for up to 24 hours. In addition, the PR08 supports multiple control methods. User can centrally manage devices with minimum operation and data cost while enjoying outstanding efficiency and rich features.
