

## Reliable Connectivity When It Matters Most

Seamless failover and secure wireless backup internet to keep business in motion

For2Fi Backup Internet is the safety net your business deserves. Whether you're running a busy retail store, a patient-focused healthcare facility, or a high-traffic hotel, connectivity disruptions can mean lost revenue, compromised service, and frustrated customers. For2Fi delivers enterprise-grade wireless backup using 5G and LTE networks to keep your POS systems, patient monitors, and guest services online—no matter what. With plug-and-play hardware, encrypted connections, and remote monitoring, our solution ensures business continuity, compliance, and peace of mind. It's backup internet, built for the real world.

### Together, We Achieve Better Outcomes

We believe the right technology investments have the power to transform. That is why For2Fi and Digi have joined forces to bring you the best of both worlds. Our services combine technological expertise and outcome-focused strategies to help you reach greater results.
